

HSAJET-BSC

Models available:

BSC-MS860
BSC-MS820
BSC-MS911
BSC-SV100
BSC-DM100

- **Improve Quality**
- **Increase Productivity**
- **Avoid Unnecessary Costs (Detect the bad barcodes before your customer does)**

Barcode Scanner Controller

The Bar Code Scanner Controller controls up to two bar code scanners/verifiers/imagers.

Provides key-switch “teach” functionality, reset, alarm light, buzzer and external device plug-in connector, so wiring is not necessary.

Provides 100% inspection of 1-D or 2-D (with DM100) Barcodes.

With the SV-100 Scanner Verifier you can analyze linear barcodes and reject based on barcode quality. Set it for “C” grade or better. Will reject if barcode does not meet ANSI standards.

Tomorrows Technology Today

HSAJET-BSC

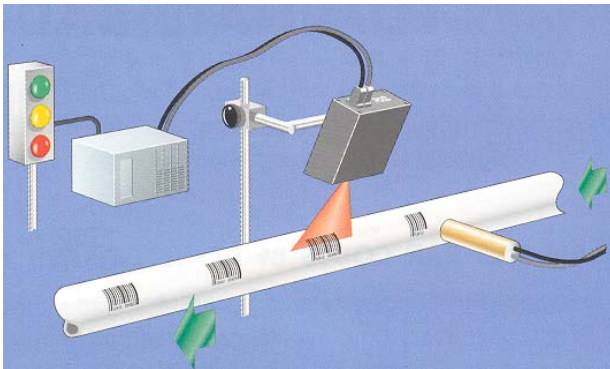

BARCODE SCANNER CONTROLLER

Features: For control of one or two barcode scanner/verifiers/imagers

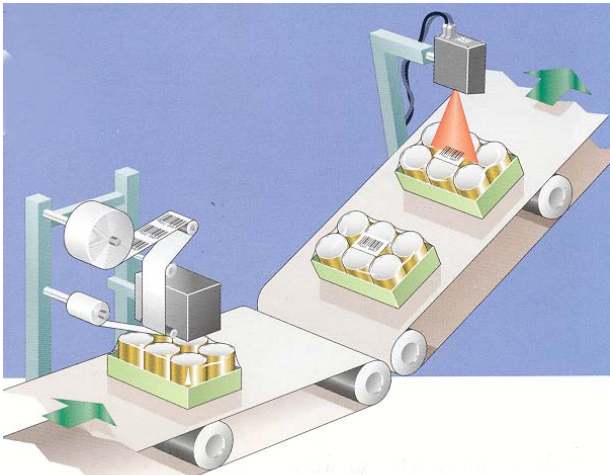

1. Alarm Light output and Audible Buzzer
2. Simple Operator Interface
3. Teach/On/Off keyed switch
4. Main Power Switch has EMI/RFI filtering and replaceable fuses
5. Connection for Scanner/Verifier #1
6. Serial connection
7. Trigger signal
8. Connection for Scanner/Verifier #2
9. Auxiliary output connections used when either a "Mismatch" or a "No-Read" condition occurs. Set scanner/readers to alarm with any number of consecutive bad reads
10. Reset to clear faults

1D Codes UPC/EAN/JAN, Codabar, Interleaved 2 of 5, Code 39, Code 128, and Code 93

2D Codes Data Matrix ECC 0, 50, 80, 100, 140, and 200, QR Code and microQR Code

UPC Code verification on products

Verification or scanning after ink jet or print & apply

Controller

- Painted Steel Cabinet
- Voltage: 120 VAC, 4 amps, 60 Hz
- One Photocell port
- Controls 1 or 2 scanner/verifiers
- Alarm output connections (2 Amp rating)
- Interfaces with many different types of scanner/verifiers/imagers
