

SPD-230

UV SINGLE-PASS DIGITAL PRINTER

Single-Pass Digital Printer

Introducing the HSAUSA SPD-230 UV Single Pass Digital Printer—an advanced device designed for creating personalized masterpieces and customized prints across various industries, including gift creation, stationery, advertising, and packaging. It prints on paper, plastic, cardboard, metal, and wood.

Equipped with cutting-edge technology, the SPD-230 offers CMYK+W color capability for vibrant designs and features a reliable Epson UV printhead. With a printing width of 230 mm and a speed of up to 50 m/min, it enhances productivity. The premium UV ink ensures durability and vivid colors, making your prints stand out.

FEATURES

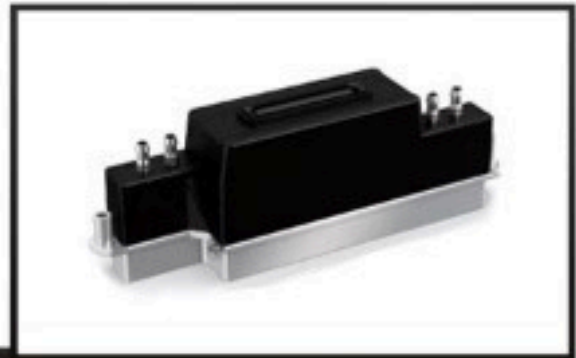

- Officially Authorized Epson UV Printhead
- PLC Control System
- Printhead Capping System
- Negative Pressure Circulation Ink Supply System
- Feeding Belt

SPD-230 FEATURES

1

Original UV Printhead authorized by Epson, unique variable size droplet technology (VSDT), 4-level grayscale printout, smooth color transition, high saturation, no color difference, able to present more picture details.

2

Adopt PLC control system, self-developed special motherboard, patent protection, unique in the market, good stability, self-contained image feathering function and variable data printing, support multi-task continuous printing.

3

The printer has automatic cleaning, automatic moisturizing, and the design life of the nozzle is more than 2 years. The printer is designed with a print head protection device to prevent the print head from being scratched and damaged by materials.

4

The printer is equipped with an automatic negative pressure circulation ink supply system, which can automatically discharge the air in the ink path to prevent the print head from being clogged. The print head is automatically cleaned and moisturized, and the design life of the print head is more than 2 years.

SPD-230 FEATURES

5

3.5L large-capacity ink supply system, equipped with uv ink that has passed the in-depth test of Sunthinks manufacturer, C/M/Y/K/W 5-color printing, strong color fastness, and stronger market adaptability.

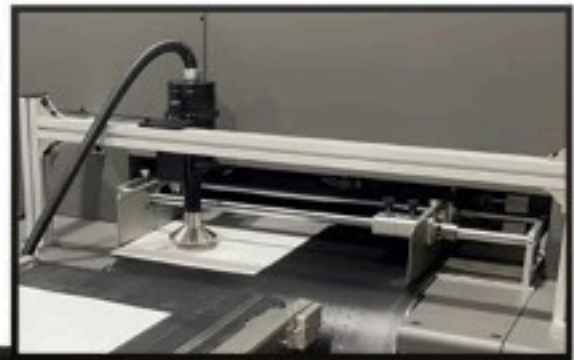

6

Advanced color management engine and color processing tools, friendly and easy-to-use color control, advanced dithering mode for photo-realistic output. Fully customizable print settings, ICC profiles available for various media and print modes, support for use of third-party RIP software.

7

Plasma treatment is automatically performed on the surface of the material before printing, and the ink sticks more firmly after printing.

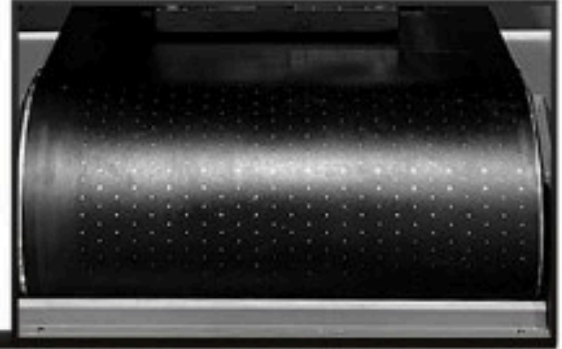

8

Fully digital Single pass printer, no need for plate making, just import pictures and print. The printing cost is low, the speed is fast, and the production efficiency is high. The max printing accuracy is 600dpi*1200dpi, the fastest printing speed is 50m/min, and the max printing length of a single image is 20m.

SPD-230 FEATURES

9

The self-developed feeding belt (patented) has a high-precision automatic deviation correction function and a reasonable layout of suction holes to ensure that the printing material is more stable during transportation.

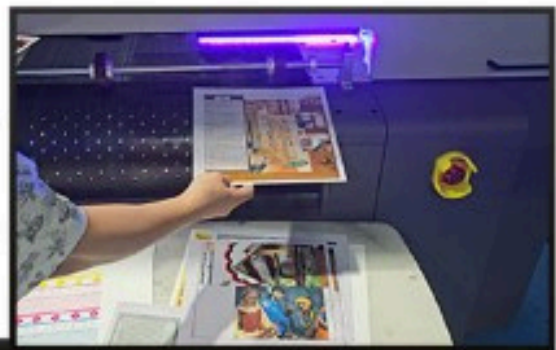

10

Professional automatic feeder. It has the characteristics of fast, stable and uniform feeding, which improves printing efficiency and saves the cost of manual feeding.

11

The market adaptability is strong, and it can undertake all kinds of scattered small orders and large batch printing orders at will. The flexible and fast printing method has enhanced the competitive advantage in the competitive environment where every second counts.
